## **What is MNSwap?**

MNSWAP is a multi-cross-chain DeFi platform supporting Polygon, Binance Smart Chain, Solana, Hashgraph, Avalanche, and Heco Chain within a single interface.

Our functionality does not end there, MNSwap plans to be proactive in designing and implementing new functions such multi-network swap in the DeFi ecosystem in a single interface there by reducing cost and difficulty that comes with this process.

MNSwap will create a revolution in the world of cryptocurrency with an innovative blockchain combining all in one. Saving investors cost and improved DeFi security.

## **Why MNSwap?**

MNSwap is the first token ever introduced in the cryptocurrency industry, that has tied all blockchain networks together. It is important to know that every crypto wallet today has various cryptocurrency in it. What if you can swap your bitcoin to SHIBA in one click? Isn't that interesting? Without a doubt, this platform is a revolution in the cryptocurrency industry.

MNS token will be in a constant demand for all cryptocurrency holders, as it will be the required currency for them to participate in this swift and hassle free multi-network swap. This will result in MNSs continually being traded between their Fiat currencies and MNS, with this demand, it is clear as day that MNSwap will have the potential to be listed in major exchanged and partnered with VIPs who deemed high aptitude for the use case of MNSwap.

The above reason will subsequently have a direct causation effect on investors, regardless of their interest in e-currency. With MNSwap's potential being

recognised, Investors are likely to regard MNSwap as a profitable investment, resulting them to hop on and become part of MNSwap's community.

In the current Cryptospace, market sentiments are generally built with hype and sustained with utility of the token. With MNSwap, we will hype the coin as one of the first multi-network token and acquire mass adoption targeting all cryptocurrency community. We will then ensure the sustainability of the token by offering unparallel utility that encourages the community to hold onto MNSs to prevent pump and dumps, which will benefit anyone in the community regardless of their demographics and goals with MNSwap.

### **Why Binance Smart Chain (BSC)?**

ERC-20 projects are unable to conduct any microtransaction payments on Ethereum due to high Ethereum gas fees. This makes it impossible to use the Ethereum network for one of its main applications. MNS was deployed on the Binance Smart Chain with the purpose of improving DeFi users. This ensures that transactions, trading, placement of bets are all carried out at the lowest possible cost while keeping the maximum possible yields.

## Token Overview

### Allocation

900,000,000,000,000 MNS Max Supply

25% - Presale

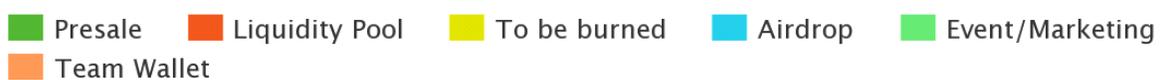

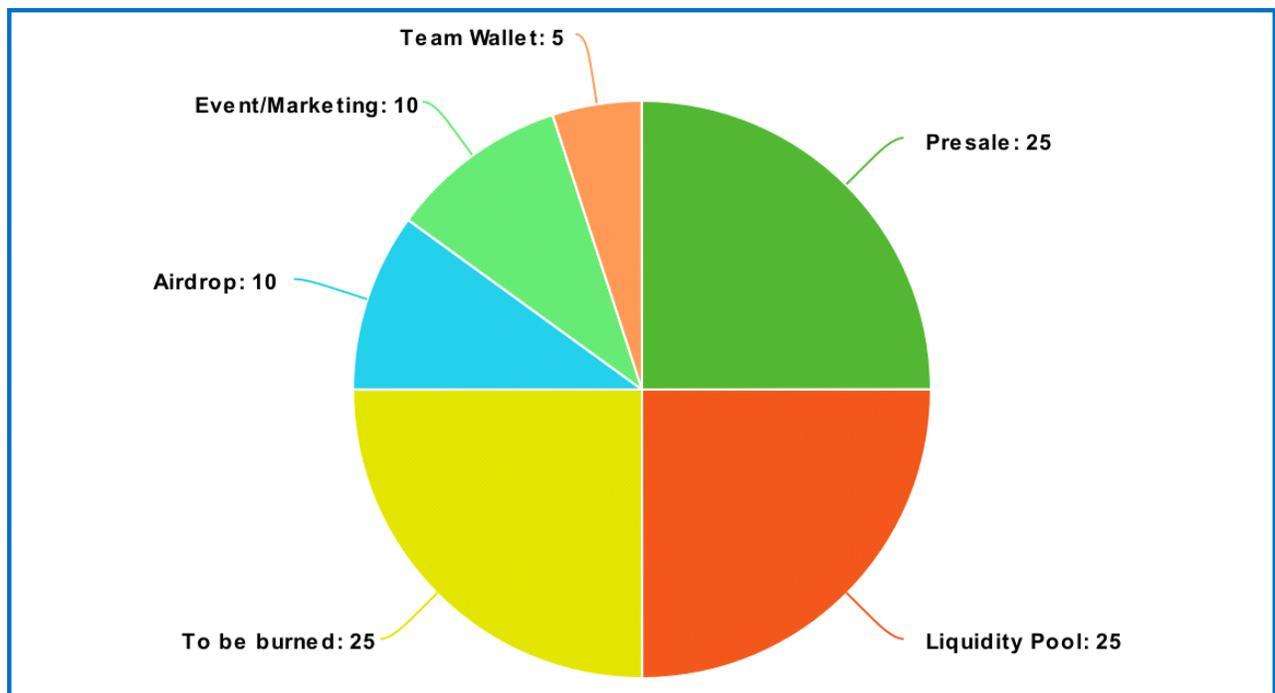

10% - Airdrop

25% - Liquidity

25% - To be burnt

10% - Event/Marketing

5% - Dev Wallet (Locked for one year)

## **Tokenomics**

Autoburn – 5%

5% of every transaction every transaction will auto burned, making the supply scarcer thus making MNS gain value over time.

Auto LP – 5%

Another 5% of every transaction will be added into the liquidity pool for stability in price.

Unlike other tokens who takes a % of every transaction for marketing purposes, MNSwap generates funds for marketing via small fees from users hosting/participating on our platform. This will result in larger amount of money going into liquidity pool and being burnt, ensuing a better tokenomic.

## **MNSwap Platform**

How will MNSwap benefit holders?

Holders will be able to use MNSwap for various purposes to make their everyday transactions simpler than ever by using MNS as a currency on our platform.

How will MNSwap benefit investors?

Investors looking to grow their portfolio will definitely be interested in MNSwap as the first bridge cryptocurrency in the market.

- Investors can deposit MNS in their app and use as fee for seamless transactions in the blockchain.
- Investors interested in owning cryptocurrency of their choice will have the luxury to do so at low cost.

- Holding MNS ultimately be beneficial to investors as its usefulness will make the token attractive and invaluable with more holders.
